

### Air Freshener Gel with the CrystaSense™ IM Series

The CrystaSense gellants set to form a clear eye-catching air freshener gel, with the warming fragrance of vanilla. When exposed to the air the fragrance is slowly released from the gel at a steady, predictable rate. Resulting air freshener can be used in both room and automotive.

Product	Functionality	% W/W
<b>CrystaSense IM700</b>	<b>Gellant</b>	<b>6.5</b>
<b>CrystaSense IM800</b>	<b>Gellant</b>	<b>19.5</b>
Vanilla Fragrance <sup>1</sup>	Fragrance	70.0
Desmodur N3300 <sup>2</sup>	Curing agent	4.0
Dye		qs

Suppliers:

1. drom Fragrances
2. Bayer MaterialScience

#### Method

Mix CrystaSense IM700 and CrystaSense IM800 together. Add vanilla fragrance and dye, then mix. Add Desmodur N3300A and mix until homogeneous. Quickly pour into moulds. Allow to cure for approximately

#### Additional Information

Resulting gels will be insoluble in water and heat-resistant. Cure time can be reduced by adjusting the ratio of CrystaSense IM700 to CrystaSense IM800, and also by heating in an oven.
